

I am 39 years old and I feel that the government should leave XM radio alone. It is a pay-per-listen service and we are entitled to have instant traffic and weather at our fingertips, if we choose to do so. I pay for the XM service because I am tired of the commercials and comments/views of Commercial disc-jockeys. It's okay that the cable and satellite tv companies offer channels and channels of porno films that are right at childrens fingertips, and there's nothing said about it. But let the big broadcast stations get their feathers flustered about "traffic and weather" broadcasts on XM and now hear comes the petitions. I have been waiting for a long time to have commercial-free music and other programming and now I have to worry about things that I pay for being taken away.

The broadcast stations make enough money. But I guess it's the big companies that really rule the world. It's a shame that we have to be forced to listen to more commercials than music on regular radio. THAT is why I subscribe to XM radio. I OPPOSE HR 4026
